Paint Your Home In Wi-Fi

Seamless, Secure Wi-Fi for Every Room

Whole-Home Wi-Fi System
Deco M5

A Whole-Home Wi-Fi System

Deco is a Wi-Fi system that uses several units working together to create seamless Wi-Fi in every room. Deco automatically creates the fastest connections possible while protecting all the devices connected to your Wi-Fi. Setting up and managing your Wi-Fi is simple with Deco, thanks to its easy-to-use app.

Adaptive Routing Technology

TP-Link ART automatically creates the best connections for your devices

Far-Reaching Coverage

Three Deco units work together to cover homes up to 4,500 sq. ft.

Easy Setup

The Deco app helps you place units around your home for quick installation

TP-Link HomeCare™

Deco delivers the most comprehensive security of any whole-home Wi-Fi system, protecting all connected devices from security threats with powerful software from TrendMicro. Deco's parental controls are easy to use, giving parents a set of powerful, intuitive tools for monitoring and managing internet access.

3-Year Built-In Antivirus

Protect all connected devices in your home from viruses and malware

Activity Reports

Review a monthly list of usage, blocked content and security threats

Strong Security

Safeguard your home network with a firewall and wireless encryption

Quality of Service

Prioritize devices and applications for faster performance when needed

Robust Parental Controls

Manage content and control when each device can access the internet

deco™

The Deco M5 Whole-home Wi-Fi System consists of three units that you install throughout your home. Deco is also sold in single packs which can be used either a starter or expansion unit. Add more Deco units to a system for greater coverage.

Whole-Home Wi-Fi System Advantages

Wi-Fi should just work in every room. Whether you want to listen to music as you cook, stream a movie while relaxing in bed or video chat with a loved one on the porch—Deco M5 will keep you connected across your entire home.

Average routers are designed to send Wi-Fi in all directions but don't always reach every room. Range extenders improve coverage but create multiple networks for you to navigate. Deco M5 uses several units working together to create seamless Wi-Fi in every room.

Specifications
